<https://www.southampton-datarecovery.co.uk/About Us>

In the year 2002, we enter into the data recovery industry. Through our professional data recovery services, we have done thousands of data recovery jobs in time with 100% result. We use advanced data recovery software to recover all your lost data or media files securely. We would like to thank you for choosing us and our services. We are working with an aim to provide you fastest and expert data recovery services at a reasonable price. You will get only best data recovery services, no matter what kind of business you have or if you are an individual PC user. Your data recovery is our primary duty

Our Clients

We have been offering professional data recovery services to all types of clients for last 15 years. Like our clients, we have professionals and many

organizations. Premier League Football Clubs (For Example Arsenal, Man United and

West Ham).

Chefs of Celebrity.

Pop Stars.

Actors and Actress or Celebrities.

Charities (For example Oxfam).

Broadcasting TV Networks (For example BBC, Sky & ITV).

Famous Authors.

High Street Shops, (For example Homebase, Argos, Starbucks, Tesco, and

Sainsbury).

Major Universities situated across the UK (For example John Moore Liverpool,

University College London, University, and Brighton University).

All types of primary, secondary and high schools, also do the job for Grammar schools.

Small, Large and medium corporation.

Professional Photographers. Factors for which we are different from others

In the UK you will find one company that will offer you fastest data recovery

services for the value is us. Over last 15 years of work, we have secured 90%

customer referral rate which is the proof of our service quality. We have the

specialized professional for the different task like for server and RAID system, for

Apple Mac recovery, and for USB Stick recovery. Why Choose Southampton Data

Recovery?

Fixed pricing on recovery (You know what you are paying - no nasty surprises).

Quick recovery turnaround at no extra cost. (Our average recovery time is 2 days).

Memory card chip reading services (1st in the UK to offer this service).

Raid recoding service (Specialist service for our business customers who have

suffered a failed server rebuild).

Our offices are 100% UK based and we never outsource any recovery work.

Strict Non-disclosure privacy and security is 100% guaranteed. Our Recovery

Process

1. Contact or call us at 02382 148925 OR ask for a quote.

2. Send your corrupted device to us.

3. Our engineers then will test the device and will recover all the lost data.

4. Using next day courier service, we will send back your recovered data to you.

Our Advice in the event of data loss:

If you have lost all the important data like contacts, business information, and

photographs, then contact us now, and our expert will resolve all your queries. We

will contact you through the mail or call and will give you the quickest data recovery

services. We will give you expert advice and will inform you about the nature of the

issues.

Our responsibility is not ending here. We will also provide you with the work cost. If

you feel happy and satisfied with our cost and services, we will advise you to pack

your device and send that device to us securely. If you want you can visit our

centres located anytime and give that device to our staff. We will give all the detail about the contact information.

**2 No obligation estimate:**  
We will begin the work and will examine the damaged device to know the issues.

Our expert will also inform you about the total cost of data recovery process. We have no hidden charges and offer fixed pricing quotes. Once we receive your

consent, we will start the recovery work.

**3 How we do lose data recovery work?**  
We normally take 2 to 3 days to finish a data recovery task. While doing that, we

first recover your lost data to our secure server. After that, we will contact you and

will mail you the details of recovered files including all the recovered directory

names. After getting 100% result in data recovery, we will get your data back on

the next day.

**4 Giving back your data to you after recovery:**  
Are you satisfied with our data recovery services? If yes, we will tell you to make the

payment. You can do the payment using your credit, debit, online banking or

cheque. After the payment, we will start backing up your data and make it ready to

return you. We will require three days to recover your data. The important thing is

we will never tell you to pay extra charges while paying us using your credit or debit

card.

**Recover your critical data**  
**NO FIX - NO FEE**

We are considered as top specialists in recovering data from several devices, which

includes external devices, RAID servers, laptops, Macs, PC's as well as other

removable devices. Having good years of experience in the data recovery sectors,

we can provide you help anytime you wish for, especially in the minefield of

recovering the data, which were considered to be lost long before.

**STEP 1**  
**Turn Off Your Computer**

In the event of a hardware failure our recommendation is that you power down your

computer to ensure that there is no further damage caused which may impede the

data recovery process.

**STEP 2**  
**Risks of DIY Recovery**

We strongly advise against running third-party recovery software or disk utilities as

these can often make an already difficult problem much worse.
